## SAVE THIS MANUAL

---

Keep this manual for the safety warnings and precautions, assembly, operating, inspection, maintenance and cleaning procedures. Write the product's serial number in the back of the manual near the assembly diagram (or month and year of purchase if product has no number). Keep this manual and the receipt in a safe and dry place for future reference.

---

### Safety Alert Symbol and Signal Words

---

In this manual, on the labeling, and all other information provided with this product:

This is the safety alert symbol. It is used to alert you to potential personal injury hazards. Obey all safety messages that follow this symbol to avoid possible injury or death.

### **DANGER**

**DANGER** indicates a hazardous

situation which, if not avoided, will result in death or serious injury.

### **WARNING**

**WARNING** indicates a

hazardous situation which, if not avoided, could result in death or serious injury.

### **CAUTION**

**CAUTION**, used with the safety

alert symbol, indicates a hazardous situation which, if not avoided, could result in minor or moderate injury.

### **NOTICE**

**NOTICE** is used to address practices not related to personal injury.

### **CAUTION**

**CAUTION**, without the safety alert symbol, is used to address practices not related to personal injury.

---

## IMPORTANT SAFETY INSTRUCTIONS

---

### INSTRUCTIONS PERTAINING TO A RISK OF FIRE, ELECTRIC SHOCK, OR INJURY TO PERSONS

---

**WARNING** – When using tools, basic precautions should always be followed, including the following:

#### General

- a. To reduce the risks of electric shock, fire, and injury to persons, read all the instructions before using the tool.

#### Work area

- a. Keep the work area clean and well lighted. Cluttered benches and dark areas increase the risks of electric shock, fire, and injury to persons.
- b. Do not operate the tool in explosive atmospheres, such as in the presence of flammable liquids, gases, or dust. The tool is able to create sparks resulting in the ignition of the dust or fumes.
- c. *Keep bystanders, children, and visitors away while operating the*

**tool.** Distractions are able to result in the loss of control of the tool.

### Personal safety

- a. **Stay alert. Watch what you are doing and use common sense when operating the tool. Do not use the tool while tired or under the influence of drugs, alcohol, or medication.** A moment of inattention while operating the tool increases the risk of injury to persons.
- b. **Dress properly. Do not wear loose clothing or jewelry. Contain long hair. Keep hair, clothing, and gloves away from moving parts.** Loose clothes, jewelry, or long hair increases the risk of injury to persons as a result of being caught in moving parts.
- c. **Avoid unintentional starting. Be sure the switch is off before connecting to the air supply.** Do not carry the tool with your finger on the switch or connect the tool to the air supply with the switch on.
- d. **Remove adjusting keys and wrenches before turning the tool on.** A wrench or a key that is left attached to a rotating part of the tool increases the risk of personal injury.
- e. **Do not overreach. Keep proper footing and balance at all times.** Proper footing and balance enables better control of the tool in unexpected situations.
- f.  **Use safety equipment.** A dust mask, non-skid safety shoes and a hard hat must be used for the applicable

conditions. Wear heavy-duty work gloves during use.

- g.  **Always wear eye protection.** Wear ANSI-approved safety goggles.
- h.  **Always wear hearing protection when using the tool.** Prolonged exposure to high intensity noise is able to cause hearing loss.

### Tool use and care

- a. **Use clamps or another practical way to secure and support the workpiece to a stable platform.** Holding the work by hand or against the body is unstable and is able to lead to loss of control.
- b. **Do not force the tool.** Use the correct tool for the application. The correct tool will do the job better and safer at the rate for which the tool is designed.
- c. **Do not use the tool if the switch does not turn the tool on or off.** Any tool that cannot be controlled with the switch is dangerous and must be repaired.
- d. **Disconnect the tool from the air source before making any adjustments, changing accessories, or storing the tool.** Such preventive safety measures reduce the risk of starting the tool unintentionally. Turn off and detach the air supply, safely discharge any residual air pressure, and release the throttle and/or turn the switch to its off position before leaving the work area.

- e. **Store the tool when it is idle out of reach of children and other untrained persons.** A tool is dangerous in the hands of untrained users.
- f. **Maintain the tool with care.** Keep a cutting tool sharp and clean. A properly maintained tool, with sharp cutting edges reduces the risk of binding and is easier to control.
- g. **Check for misalignment or binding of moving parts, breakage of parts, and any other condition that affects the tool's operation.** If damaged, have the tool serviced before using. Many accidents are caused by poorly maintained tools. There is a risk of bursting if the tool is damaged.
- h. **Use only accessories that are identified by the manufacturer for the specific tool model.** Use of an accessory not intended for use with the specific tool model, increases the risk of injury to persons.

### Service

- a. **Tool service must be performed only by qualified repair personnel.**
- b. **When servicing a tool, use only identical replacement parts. Use only authorized parts.**
- c. **Use only the lubricants supplied with the tool or specified by the manufacturer.**

### Air source

- a.  **Never connect to an air source that is capable of exceeding 200 psi.** Over pressurizing the tool may cause bursting, abnormal operation,

breakage of the tool or serious injury to persons. Use only clean, dry, regulated compressed air at the rated pressure or within the rated pressure range as marked on the tool. Always verify prior to using the tool that the air source has been adjusted to the rated air pressure or within the rated air-pressure range.

- b. Stay within the maximum air pressure capacity (**90 PSI**). Never operate the Sander above 90 PSI.
- c. **Never use oxygen, carbon dioxide, combustible gases or any bottled gas as an air source for the tool.** Such gases are capable of explosion and serious injury to persons.

**SAVE THESE INSTRUCTIONS.**

## **SYMBOLS AND SPECIFIC SAFETY INSTRUCTIONS**

### Symbol Definitions

Symbol	Property or statement
<b>n<sub>o</sub></b>	No-load speed
<b>.../min</b>	Revolutions or reciprocation per minute
<b>PSI</b>	Pounds per square inch of pressure
<b>CFM</b>	Cubic Feet per Minute flow
<b>SCFM</b>	Cubic Feet per Minute flow at standard conditions
<b>NPT</b>	National pipe thread, tapered

Chart continued in next column.

## Symbol Definitions

Symbol	Property or statement
<b>NPS</b>	National pipe thread, straight
	WARNING marking concerning Risk of Eye Injury. Wear ANSI-approved eye protection.
	WARNING marking concerning Risk of Hearing Loss. Wear hearing protection.
	WARNING marking concerning Risk of Respiratory Injury. Wear NIOSH-approved dust mask/respirator.
	WARNING marking concerning Risk of Explosion.

## Specific Safety Instructions

- The warnings and precautions discussed in this manual cannot cover all possible conditions and situations that may occur. It must be understood by the operator that common sense and caution are factors which cannot be built into this product, but must be supplied by the operator.
- WARNING: Some dust created by power sanding, sawing, grinding, drilling, and other construction activities, contains chemicals known [to the State of California] to cause cancer, birth defects or other reproductive harm. Some examples of these chemicals are:
  - Lead from lead-based paints
  - Crystalline silica from bricks and cement or other masonry products
  - Arsenic and chromium from chemically treated lumber
 Your risk from these exposures varies, depending on how often you do this type of work. To reduce your exposure to these chemicals: work in
- Only use with accessories rated to handle the forces exerted by this tool during operation. Other accessories not designed for the forces generated may break and forcefully launch pieces.
- Attach all accessories properly to the tool before connecting the air supply. A loose accessory may detach or break during operation.
- Obey the manual for the air compressor used to power this tool.
- Install an in-line shutoff valve to allow immediate control over the air supply in an emergency, even if a hose is ruptured.
- Always use 5 inch diameter Sanding Paper with this tool. Sanding Paper that does not match the Pad (26) diameter of the Sander will run eccentrically, causing loss of control or may fly off the Sander.
- The Pad (26) and Sanding Paper will become hot while sanding. Allow the Pad and Sanding Paper to completely cool before handling.
- To avoid injury, keep hands and fingers away from the rotating Pad (26). If both hands are holding the Sander,

a well ventilated area, and work with approved safety equipment, such as those dust masks that are specially designed to filter out microscopic particles. (California Health & Safety Code § 25249.5, *et seq.*)

WARNING: The brass components of this product contain lead, a chemical known to the State of California to cause birth defects (or other reproductive harm). (California Health & Safety code § 25249.5, *et seq.*)

- your hands and fingers cannot be cut by the rotating Pad or Sanding Paper (not included).
10. Do not lay the tool down until it has come to a complete stop. Moving parts can grab the surface and pull the tool out of your control.
  11. Disconnect air hose and release any built-up air pressure. Never service the Sander with the air hose attached. Always release any built-up air pressure in the tool (even after disconnecting the air hose).
  3. Wear suitable gloves to reduce the vibration effects on the user.
  4. Use tools with the lowest vibration when there is a choice.
  5. Include vibration-free periods each day of work.
  6. Grip tool as lightly as possible (while still keeping safe control of it). Let the tool do the work.
  7. To reduce vibration, maintain tool as explained in this manual. If abnormal vibration occurs, stop immediately.

### **Vibration Precautions**

This tool vibrates during use. Repeated or long-term exposure to vibration may cause temporary or permanent physical injury, particularly to the hands, arms and shoulders. To reduce the risk of vibration-related injury:

1. Anyone using vibrating tools regularly or for an extended period should first be examined by a doctor and then have regular medical check-ups to ensure medical problems are not being caused or worsened from use. Pregnant women or people who have impaired blood circulation to the hand, past hand injuries, nervous system disorders, diabetes, or Raynaud's Disease should not use this tool. If you feel any symptoms related to vibration (such as tingling, numbness, and white or blue fingers), seek medical advice as soon as possible.
2. Do not smoke during use. Nicotine reduces the blood supply to the hands and fingers, increasing the risk of vibration-related injury.

**SAVE THESE  
INSTRUCTIONS.**

## FUNCTIONAL DESCRIPTION

### Specifications

Operating Air Pressure	90 PSI
Air Inlet	1/4" -18 NPT
Maximum Speed*	10,000 RPM
Air Consumption	9 SCFM @ 90 PSI

\* Maximum speed at stated maximum air pressure. Excess air pressure is hazardous and may cause the tool to exceed stated maximum speed.

### Components and Controls

Figure 1

## INITIAL TOOL SET UP/ ASSEMBLY

Read the **ENTIRE IMPORTANT SAFETY INFORMATION** section at the beginning of this manual including all text under subheadings therein before set up or use of this product.

**Note:** For additional information regarding the parts listed in the following pages, refer to the Assembly Diagram near the end of this manual.

### Unpacking

When unpacking, make sure that the item is intact and undamaged. If any parts are missing or broken, please call Harbor Freight Tools at 1-800-444-3353 as soon as possible.

- This air tool may be shipped with a protective plug covering the air inlet. Remove this plug before set up.

### Air Supply

#### ⚠ WARNING

#### TO PREVENT EXPLOSION:

Use only clean, dry, regulated, compressed air to power this tool. Do not use oxygen, carbon dioxide, combustible gases, or any other bottled gas as a power source for this tool.

1. Incorporate a filter, regulator with pressure gauge, oiler, in-line shutoff valve, and quick coupler for best service, as shown in the diagram above. **An in-line shutoff ball valve is an important safety device because it controls the air supply even if the air hose is ruptured. The shutoff valve should be a ball valve because it can be closed quickly.**

**Note:** If an automatic oiler system is not used, add a few drops of Pneumatic Tool Oil to the airline connection before operation. Add a few more drops after each hour of continual use.

2. Attach an air hose to the compressor's air outlet. Connect the air hose to the air inlet of the tool. Other components, such as a connector and quick coupler, will make operation more efficient, but are not required.

**⚠WARNING! TO PREVENT SERIOUS INJURY FROM ACCIDENTAL OPERATION:**

**Do not install a female quick coupler on the tool.** Such a coupler contains an air valve that will allow the air tool to retain pressure and operate accidentally after the air supply is disconnected.

**Note:** Air flow, and therefore tool performance, can be hindered by undersized air supply components.

3. The air hose must be long enough to reach the work area with enough extra length to allow free movement while working.
4. Release the Paddle; refer to Operation section for description of controls.

5. Close the in-line safety valve between the compressor and the tool.
6. Turn on the air compressor according to the manufacturer's directions and allow it to build up pressure until it cycles off.
7. Adjust the air compressor's output regulator so that the air output is enough to properly power the tool, but the output will not exceed the tool's maximum air pressure at any time. Adjust the pressure gradually, while checking the air output gauge to set the right pressure range.
8. Inspect the air connections for leaks. Repair any leaks found.
9. If the tool will not be used at this time, turn off and detach the air supply, safely discharge any residual air pressure, and release the Paddle to prevent accidental operation.

**Note:** Residual air pressure should not be present after the tool is disconnected from the air supply. However, it is a good safety measure to attempt to discharge the tool in a safe fashion after disconnecting to ensure that the tool is disconnected and unpowered.

## **OPERATING INSTRUCTIONS**

Read the **ENTIRE IMPORTANT SAFETY INFORMATION** section at the beginning of this manual including all text under subheadings therein before set up or use of this product.

Inspect tool before use, looking for damaged, loose, and missing parts. If any problems are found, do not use tool until repaired.

### **Tool Set Up**

#### **WARNING TO PREVENT SERIOUS INJURY**

**FROM ACCIDENTAL OPERATION:**

Release the Paddle (9) of the Sander, detach the air supply, and safely discharge any residual air pressure in the Sander before performing any inspection, maintenance, or cleaning procedures.

**TO PREVENT SERIOUS INJURY:**

Do not adjust or tamper with any control or component in a way not specifically explained within this manual. Improper adjustment can result in tool failure or other serious hazards.

1. Press a 5" diameter sand paper disc (not included) onto the Sander's Pad (26).
2. Place the Sander's Anchor (33) in a container filled with cold, clean water.

3. Attach the free end of the Hose (32) to the Sander by pushing it into the Hose Joint (12). (To remove, push the collar and pull the hose out. Prior to reattachment, trim 1/4" from the end of the hose.)
4. Turn Adjuster (34) in either direction to regulate flow of water.

**CAUTION!** Use only cold, clean water. Never run the Wet Sander without a water supply.

5. Connect a compressed air supply hose (not included) to the Sander.
6. Turn on the air compressor, and set its regulator to 90 PSI. **Do not exceed 90 PSI.**

### **Work Piece and Work Area Set Up**

1. Designate a work area that is clean and well-lit. The work area must not allow access by children or pets to prevent injury and distraction.
2. Route the air hose and water hose along a safe route to reach the work area without creating a tripping hazard or exposing the hoses to possible damage. The hoses must be long enough to reach the work area with enough extra length to allow free movement while working.
3. Secure loose workpieces using a vise or clamps (not included) to prevent movement while working.
4. There must not be hazardous objects (such as utility lines or foreign objects) nearby that will present a hazard while working.
5. Work surface must be free of any metal objects.

## **General Operating Instructions**

1. If an automatic oiler is not used, add a few drops of Pneumatic Tool Oil to the airline connection before use. Add a few drops more after each hour of continual use.
2. Grip the Sander firmly. Then squeeze the Paddle (9) and allow the Pad (26) to move in its orbital motion to its fullest speed.
3. To adjust the water flow rate of the Sander, turn the Adjuster (34) located on the Anchor (33).
4. Sand the workpiece evenly with gentle, broad, sweeping strokes in a criss-cross pattern.
5. During the sanding process, it may become necessary to occasionally stop the Sander, disconnect the tool from its compressed air supply source, remove any remaining compressed air from the tool by squeezing its Paddle (9), and replace the worn Sand Paper Disc with a new Disc.
6. Once the sanding is completed, release pressure on the Paddle (9) to stop the Sander. Remove the Anchor (33) from its container of water. Raise the Hose above the Sander and restart the Sander to empty the tool of any remaining water. Turn off the air compressor. Disconnect the Sander from its air supply hose. Then squeeze the Paddle once again to release any remaining compressed air from the tool.
7. Make sure to store the Sander in a clean, dry, safe location out of reach of children and other unauthorized people.
8. If the tool requires more force to accomplish the task, verify that the tool receives sufficient, unobstructed airflow (CFM) and increase the pressure (PSI) output of the regulator up to the maximum air pressure rating of this tool.  
**CAUTION! TO PREVENT TOOL AND ACCESSORY FAILURE, RESULTING IN INJURY:**  
**Do not exceed the tool's maximum air pressure rating of 90 PSI.**  
If the tool still does not have sufficient force at maximum pressure and sufficient airflow, then a larger tool may be required.
9. To prevent accidents, turn off the tool, detach the air supply, safely discharge any residual air pressure in the tool, and release the Paddle after use. Clean external surfaces of the tool with a clean, dry cloth, and apply a thin coat of tool oil to metal surfaces. Then store the tool indoors out of children's reach.

---

## USER-MAINTENANCE INSTRUCTIONS

---

Procedures not specifically explained in this manual must be performed only by a qualified technician.

### **WARNING**

#### TO PREVENT SERIOUS INJURY

##### FROM ACCIDENTAL OPERATION:

Release the Paddle (9) of the Sander, detach the air supply, and safely discharge any residual air pressure in the Sander before performing any inspection, maintenance, or cleaning procedures.

##### TO PREVENT SERIOUS INJURY FROM TOOL FAILURE:

Do not use damaged equipment. If abnormal noise, vibration, or leaking air occurs, have the problem corrected before further use.

##### TO PREVENT EXPLOSION:

Lubricate the tool only with specified lubricants. Lubricate the air inlet using only pneumatic tool oil. Lubricate the internal mechanism using only white lithium grease. Other lubricants may damage the mechanism and may be highly flammable, causing an explosion.

---

## Cleaning, Maintenance, and Lubrication

---

**Note:** These procedures are in addition to the regular checks and maintenance explained as part of the regular operation of the air-operated tool.

1. **Daily - Air Supply Maintenance:**  
Every day, perform maintenance on the air supply according to the component manufacturers' instructions. The lubricator's oil level needs to be maintained and the moisture filter must be regularly drained. Performing routine maintenance on the air supply will allow the Sander to operate more safely and will also reduce wear on the Sander.
2. **BEFORE EACH USE**, inspect the general condition of the Sander. Check for loose parts, misalignment or binding of moving parts, cracked or broken parts, damaged hose, and any other condition that may affect its safe operation.
3. **DAILY**, check the Strainer (35) in the Anchor (33) for excess dirt and debris. If necessary, clean Strainer. **(See Assy. Diagram.)**

## Troubleshooting

Problem	Possible Causes	Likely Solutions
Sander will not start.	<ol style="list-style-type: none"> <li>1. No compressed air supply.</li> <li>2. Shut-off Valve is closed.</li> <li>3. Insufficient pressure on the Paddle.</li> <li>4. Air pressure too low.</li> <li>5. Regulator set too low.</li> </ol>	<ol style="list-style-type: none"> <li>1. Connect Sander to a compressed air supply.</li> <li>2. Open Shut-off Valve.</li> <li>3. Press harder on Paddle.</li> <li>4. Set air compressor regulator to 90 PSI.</li> <li>5. Adjust regulator setting.</li> </ol>
Sand Paper Disc not orbiting, or orbiting slowly.	<ol style="list-style-type: none"> <li>1. Air pressure too low.</li> <li>2. Insufficient compressed air supply.</li> <li>3. Regulator Set adjusted too low.</li> <li>4. Leaks in Air Hose.</li> </ol>	<ol style="list-style-type: none"> <li>1. Squeeze harder on the Paddle.</li> <li>2. Set air compressor regulator to 90 PSI.</li> <li>3. Adjust Regulator Set for a higher orbital speed.</li> <li>4. Check Air Hose joints for leaks.</li> </ol>
Water flow low or nonexistent	<ol style="list-style-type: none"> <li>1. Water Flow Control improperly set.</li> <li>2. Clogged Strainer.</li> <li>3. No water in supply tank.</li> </ol>	<ol style="list-style-type: none"> <li>1. Adjust Water Flow Adjuster for increased water flow.</li> <li>2. Remove Strainer and clean.</li> <li>3. Fill supply tank.</li> </ol>
Sander does not remove residue from the workpiece, even after repeated brief attempts.	<ol style="list-style-type: none"> <li>1. Sand paper disc too fine.</li> <li>2. Using wrong tool for the job at hand.</li> <li>3. Water Flow Control improperly set.</li> <li>4. Fill supply tank.</li> </ol>	<ol style="list-style-type: none"> <li>1. Use a more coarse sand paper disc.</li> <li>2. Do not continue sanding to avoid damaging workpiece surface. Use another method to remove residue.</li> <li>3. Adjust Water Flow Adjuster for increased water flow.</li> <li>4. Fill supply tank.</li> </ol>
Severe air leakage. (Slight air leakage is normal, especially on older tools.)	<ol style="list-style-type: none"> <li>1. Cross-threaded housing components.</li> <li>2. Loose housing.</li> <li>3. Damaged valve or housing.</li> <li>4. Dirty, worn or damaged valve.</li> </ol>	<ol style="list-style-type: none"> <li>1. Check for incorrect alignment and uneven gaps. If cross-threaded, disassemble and replace damaged parts before use.</li> <li>2. Tighten housing assembly. If housing cannot tighten properly, internal parts may be misaligned.</li> <li>3. Replace damaged components.</li> <li>4. Clean or replace valve assembly.</li> </ol>
Sander does not remove adequate material	<ol style="list-style-type: none"> <li>1. Worn sandpaper.</li> <li>2. Fine grit sandpaper.</li> </ol>	<ol style="list-style-type: none"> <li>1. Replace sandpaper/</li> <li>2. Use coarser grit sandpaper.</li> </ol>
 <b>Follow all safety precautions whenever diagnosing or servicing the tool. Disconnect air supply before service.</b>		

## **PLEASE READ THE FOLLOWING CAREFULLY**

THE MANUFACTURER AND/OR DISTRIBUTOR HAS PROVIDED THE PARTS LIST AND ASSEMBLY DIAGRAM IN THIS MANUAL AS A REFERENCE TOOL ONLY. NEITHER THE MANUFACTURER OR DISTRIBUTOR MAKES ANY REPRESENTATION OR WARRANTY OF ANY KIND TO THE BUYER THAT HE OR SHE IS QUALIFIED TO MAKE ANY REPAIRS TO THE PRODUCT, OR THAT HE OR SHE IS QUALIFIED TO REPLACE ANY PARTS OF THE PRODUCT. IN FACT, THE MANUFACTURER AND/OR DISTRIBUTOR EXPRESSLY STATES THAT ALL REPAIRS AND PARTS REPLACEMENTS SHOULD BE UNDERTAKEN BY CERTIFIED AND LICENSED TECHNICIANS, AND NOT BY THE BUYER. THE BUYER ASSUMES ALL RISK AND LIABILITY ARISING OUT OF HIS OR HER REPAIRS TO THE ORIGINAL PRODUCT OR REPLACEMENT PARTS THERETO, OR ARISING OUT OF HIS OR HER INSTALLATION OF REPLACEMENT PARTS THERETO.

## 90 DAY WARRANTY

---

Harbor Freight Tools Co. makes every effort to assure that its products meet high quality and durability standards, and warrants to the original purchaser that this product is free from defects in materials and workmanship for the period of 90 days from the date of purchase. This warranty does not apply to damage due directly or indirectly, to misuse, abuse, negligence or accidents, repairs or alterations outside our facilities, criminal activity, improper installation, normal wear and tear, or to lack of maintenance. We shall in no event be liable for death, injuries to persons or property, or for incidental, contingent, special or consequential damages arising from the use of our product. Some states do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation of exclusion may not apply to you. THIS WARRANTY IS EXPRESSLY IN LIEU OF ALL OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING THE WARRANTIES OF MERCHANTABILITY AND FITNESS.

To take advantage of this warranty, the product or part must be returned to us with transportation charges prepaid. Proof of purchase date and an explanation of the complaint must accompany the merchandise. If our inspection verifies the defect, we will either repair or replace the product at our election or we may elect to refund the purchase price if we cannot readily and quickly provide you with a replacement. We will return repaired products at our expense, but if we determine there is no defect, or that the defect resulted from causes not within the scope of our warranty, then you must bear the cost of returning the product.

This warranty gives you specific legal rights and you may also have other rights which vary from state to state.

**3491 Mission Oaks Blvd. • PO Box 6009 • Camarillo, CA 93011 • (800) 444-3353**
